Empathy map :

The empathy map serves as a straightforward and visually intuitive tool that encapsulates insights into a user's behavioral patterns and perspectives. It proves instrumental in enhancing a team's comprehension of their target users. To devise a potent solution, it is crucial to grasp the genuine essence of the problem and empathize with the individual encountering it. By engaging in the process of constructing an empathy map, participants are prompted to contemplate the user's viewpoint, encompassing their aspirations and obstacles, thereby fostering a more holistic understanding of their needs and experiences.
